PORTFOLIO

PROFILE

Customer Success Manager with a strong technical and commercial background built across 3 years in demanding B2B cybersecurity environments, managing enterprise (CAC 40) accounts, C-level and CISO stakeholders, and complex technical deployments. Skilled in strategic account management, contract renewals, and commercial performance analysis. Trilingual, Azure-certified, and proficient with CRM, data, and automation tools.

SKILLS

Customer Success: CSAT · Churn · Retention · Renewals · ARR · Account Plans · QBR · SLA Reporting · NPS · Upsell · Cross-sell · Account Management

Service Delivery: Technical Implementation · Client Onboarding · Go-to-Market · Roadmap · Milestone & Risk Tracking · RFP

CRM & Tools: Salesforce · HubSpot · Jira · Mailjet · Stonly · Notion

Data & Reporting: CS Analytics · Power BI · OpenSearch · Power Automate · Excel · PowerPoint

Dev & Automation: Python · GitHub · GitLab

Soft Skills: Emotional Intelligence · C-Level & CISO Stakeholder Management · Active Listening · Adaptability · Leadership

WORK EXPERIENCE

Thales — Customer Success Manager — Cybersecurity & Secure Communications

Aug 2025 – Sep 2026

Citadel/Cryptobox — encrypted messaging platform and cloud security

- Managed client relationships for a portfolio of 20–40 CAC 40 enterprise accounts: tracked NPS/CSAT and digital adoption, owned contract renewals with a 93% retention rate and €350K in incremental ARR, and identified upsell opportunities up to €100K
- Delivered monthly SLA reports and 10–20 quarterly QBRs with C-level and CISO stakeholders (8–15 contacts): milestone tracking, risk management, and corrective action plans
- Resolved 5–10 critical security incidents: cross-functional coordination (Sales, Product, Support, R&D) for root cause analysis and service continuity within enterprise SLA commitments
- Built Customer Success / Account Plans: business objectives, governance, technical onboarding for 4–10 clients, adoption programmes, and GTM alignment for long-term account health
- Built CS Analytics from scratch (Python) — integrated CRM, usage analytics, and automated PPTX/Power BI reporting: adopted by a 4-person team, saving 2h per report and ~€20K by avoiding a third-party CRM

Inetum — Business Development Representative

Sep 2022 – Nov 2024

- Generated €500K+ in revenue through active prospecting (5+ meetings/week) and secured €200K+ in additional revenue by responding to strategic RFPs
- Led technical recruitment missions: conducted interviews with consultants to assess their assignments, skills, and availability, then matched them to client needs
- Built an AI-powered tool to accelerate client responses by automating internal profile search, reducing time-to-match across the company's talent pool
- Analysed client needs and proposed tailored technical solutions (cybersecurity, cloud, infrastructure)

EDUCATION

INSEEC Paris

Sep 2025 – Sep 2026

MSc Business Development

Client Relations & Customer Experience · B2B Marketing & Commercial Strategy · Customer Journey & CRM

Euridis Business School

Sep 2022 – Nov 2024
