ABDELKADER ARBAOUI

PORTFOLIO

Customer Success Manager

abdelarbb@gmail.com | +33 6 51 26 39 76 | LinkedIn: Abdelkader Arbaoui | Open to relocate

PROFILE

Trilingual professional with 3 years of experience in customer-facing and commercial roles, focused on Customer Success. Passionate about AI, data, and emerging technologies, I use data and automation to support product adoption and customer experience.

SKILLS

Customer Success: Portfolio/account health · QBR/SLA · NPS/CSAT · Retention/renewals · ARR · Upsell · Onboarding/adoption · C-level/CISO · Billing/collections · Margin

Service Delivery: Technical setup · Training/workshops/webinars · Adoption campaigns · Project management · Team leadership · Documentation · Voice of the customer · Roadmap/testing · RFP

CRM & Tools: Salesforce · HubSpot · Jira · Confluence · Notion · SharePoint

Data & Reporting: Python · SQL · CS Analytics · Power BI · Excel/VBA · SAP · PowerPoint · OpenSearch · Power Automate

Dev & Automation: AI tools · GitHub/GitLab · API integration · Open Banking

Soft Skills: Emotional intelligence · Stakeholder management · Active listening · Adaptability · Leadership

WORK EXPERIENCE

Thales — Customer Success Manager — Cybersecurity & Secure Communications

Aug 2025 – Sep 2026

Citadel/Cryptobox — encrypted messaging platform and cloud security

- Managed ~40 accounts, from CAC 40 groups to smaller organisations: usage/account-health segmentation, NPS/CSAT, adoption, renewals (93% retention; €500K ARR) and upsell up to €100K.
- Delivered monthly SLA reports and quarterly QBRs to C-level/CISO stakeholders, covering milestones, risks and corrective actions.
- Coordinated 5–10 security incidents with Sales, Product, Support and R&D: root-cause analysis and service continuity within SLAs.
- Led Customer Success Plans: objectives, governance, client setup/onboarding, 1:1 and 1:many adoption, training, webinars, email campaigns and GTM alignment.
- Built CS Analytics in Python/SQL across CRM and usage data, automating PPTX/Power BI reporting; adopted by 4 people, saving 2h/report and ~€20K on CRM.
- Owned client billing/collections, service pricing and margin management.
- Ongoing project: single documentation portal with product guides, coordinated with Product teams; brought customer needs into roadmap/user testing and supported releases, client setup and platform launches.

Inetum — Business Development Representative

Sep 2022 – Nov 2024

- Generated €500K+ in revenue (5+ meetings/week) and €200K+ in additional revenue through strategic RFPs.
- Interviewed consultants on assignments, skills and availability, then matched them to client opportunities.
- Built an AI tool for internal profile search and drove adoption through task allocation, user coaching and internal training documentation.
- Analysed client needs and proposed cybersecurity, cloud and infrastructure solutions.
- Led five consultants/developers: follow-up, assignments, training, mentoring, corrective feedback and conflict resolution.

PERSONAL PROJECTS

JobLeaf — Creator & Product Owner — Job-search SaaS (jobleaf.app)

2026 – Present

Web platform that tells job seekers what to do next: tracking, offer-to-background analysis, tailored résumé, never inventing facts or applying for them.

- Designed and deployed to production a multi-tenant SaaS (Node.js/Express, Supabase/PostgreSQL, Cloudflare, Stripe, PostHog): per-account data isolation (RLS), 850+ automated tests, versioned releases with rollback.
- Defined and built the onboarding: 4-step “Getting started” path (import résumé, import offer, first application, first analysis) ticked from real usage, plus 5 welcome credits, to bring each new user to first value without hand-holding.
- Built adoption and retention levers: “Today” page (daily actions and follow-ups), morning email digest sent only when there is an action, interview and milestone notifications; aggregated, identity-free counters to measure whether reminders help.
- Developed offer-to-background compatibility analysis and ATS check: requirements ranked proven/transferable/missing with the supporting evidence cited, ATS reading findings (Workday, Greenhouse, Taleo…), no opaque score: informed decision to apply.
- Designed résumé tailoring per offer: new résumé in the original layout, controls blocking any unsupported figure, date, tool or language level, confirmation questions to the user and line-by-line review before export.
- Integrated a free offer watch (36 employers via 8 public-API ATS, job-board email alerts), with the offers closest to the user’s background first.
- Set up monetisation: Stripe Checkout credits, debit reserved then released on failure; consent-based PostHog analytics; GDPR/AI Act compliance.

EDUCATION

INSEEC Paris

Sep 2025 – Sep 2026

MSc Business Development

Euridis Business School

Sep 2022 – Nov 2024

Master in Sales Engineering
